RIVETWELL™

Boltless shelving is designed to maximize storage space and minimize installation set-up time.

All components are engineered to attach snugly to one another without the use of loose fasteners. This unique design has rivets which are factory attached to all left-to-right and front-to-back beams. The rivets align with keyhole slots in the vertical posts. Once tapped into place using a standard rubber mallet, the units are tightly assembled providing maximum strength.

Standard units consist of vertical angle posts at the corners, double rivet angle beams at the top and bottom perimeter and single rivet angle beams running left-to-right only at the intermediate levels. Shelves are of standard 5/8" particle board, EZ-Deck steel or wire decking and simply drop into place. Shelf strength can be increased by upgrading to heavy duty beams, adding single rivet beams running front-to-back at the intermediate levels, upgrading to double rivet beams at the full perimeter of the intermediate levels or upgrading all levels to our strongest double rivet channel beams. Optional center supports can be added using supplied hardware to increase decking capacity.

The versatility of our Rivetwell boltless shelving system allows you to mix and match components to meet your unique application. From standard storage applications, record storage to automotive tire racks, Rivetwell boltless shelving is your storage solution.

1 Angle Post (Standard Duty): 1-1/2" x 1-1/2" x 14 gauge cold rolled steel corner post uprights. Perfect for standard load situations.

Angle Post (Heavy Duty): Shall be 1-7/8" x 1-7/8" x 14 gauge cold rolled steel uprights. The choice when heavy duty shelving is required. Perfect for multilevel installations.

2 T-Post (Standard Duty): 3" x 1-7/8" x 14 gauge cold rolled steel intermediate uprights.

T-Post (Heavy Duty): 3-3/4" x 1-7/8" x 14 gauge cold rolled steel intermediate uprights.

3 Single Rivet Shelf Beam (Standard Duty): This 14 gauge low profile standard intermediate level shelf beam is perfect when maximum clear opening is required between shelf levels.

Single Rivet Shelf Beam (Heavy Duty): An 11 gauge heavy duty version of our low profile intermediate shelf beam allowing maximum clear opening between shelf levels.

4 Double Rivet Angle Beam (Standard Duty): This 16 gauge shelf beam is essential for stability of standard units; therefore, is used on all four sides at the top and bottom levels. Can also be used front and back or on all four sides of intermediate levels to increase unit stability and load capacity.

Double Rivet Angle Beam (Heavy Duty): An upgrade to our standard duty double rivet angle beams, our heavy duty double rivet angle beams provide additional unit rigidity and even higher shelf capacity.

5 Double Rivet Channel Beam: Maximized left-to-right shelf capacity is achieved using our 14 gauge double rivet channel beams in lieu of double rivet angle beams. These beams cannot be used at the bottom level.

6 Center Support: Used to provide additional shelf support front-to-back by bolting between double rivet beams at pre-punched locations. Ideal for wider spans.

7 Double Rivet Z-Beam (Standard Duty): For 12" thru 60" beams. Used in place of double rivet angle beams to add 1" additional clearance between shelf levels. Allows particle board decking to sit flush with beam. Protects decking edges. When used at bottom level of single rivet units, shelf clearance is increased by 1" at lower level. Standard Z beams are 14 gauge.

8 Double Rivet Z-Beam (Heavy Duty): For 69" and 72" beams. Used in place of double rivet angle beams to add 1" additional clearance between shelf levels. Allows particle board decking to sit flush with beam. Protects decking edges. Heavy-Duty Z beams are 14 gauge

9 Center Support for Z-Beam: Used with Z-Beams for front to back decking support. Fabricated of 11 gauge cold rolled steel.

UNIT GROWTH CHART

When designing a shelving layout, unit growth must be considered. To determine the overall dimension of a continuous row of shelving employing T-Posts or Angle Posts with tie plates, refer to the table below.

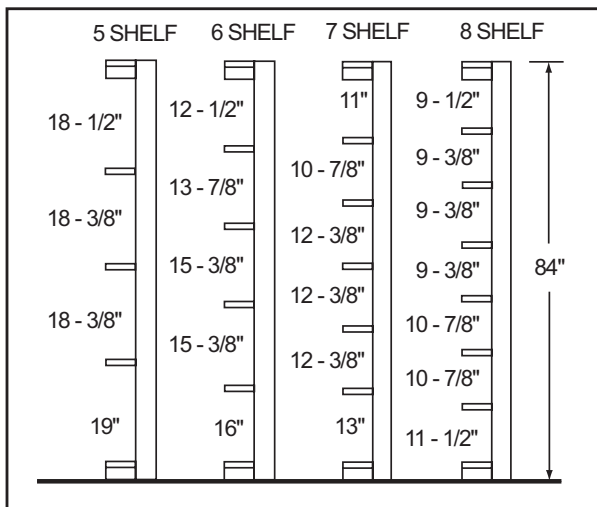

Unit Clear Width

Examples below are based on 36" wide shelf.

Vertical Shelf Clearance for Single Rivet Units

This chart depicts shelf clearances for typical rivetwell shelving units with 1-1/2" vertical shelf adjustment

Vertical Shelf Clearance for Double Rivet units

Starter units consist of four standard angle posts, four left-to-right standard double rivet angle beams, four front-to-back standard double rivet angle beams, two left-to-right standard single rivet beams per intermediate level and two front-to-back standard single rivet beam at one intermediate level only (30" and 36" deep units include two front-to-back single rivet beams at each intermediate level).

Adder units consist of two standard T-Posts, four left-to-right standard double rivet angle beams, two front-to-back standard double rivet angle beam, two left-to-right standard single rivet beam per intermediate level and one front-to-back standard single rivet beam at one intermediate level only (30" and 36" deep units include one front-to-back single rivet beam at each intermediate level).

Be sure to order one each of Wire or Particle board decking per level.

Decking options (sold separately)
EZ-Deck steel decking can NOT be used on single rivet units.

Standard 5-shelf single rivet starter unit
 (order decking separately)

NOTE: The above load chart refers to the deck materials only. Particle board decking is 5/8" industrial grade type 1-M-2. EZ-Deck steel decking is 22 gauge galvanized sheet steel fabricated in 6" deep channel planks (models listed above include multiple planks to meet unit depth). 15" deep Ez-Deck will be shipped in two (2) 7 1/2" deep planks. The allowable shelf load capacity may be reduced due to allowable post and / or beam capacities. Specific deflection limits may also reduce the shelf load capacity. NOTE: EZ-Deck must be center supported on units 48" wide and wider.

Particle Board Decking

EZ-Deck Steel Decking

NOTE: EZ-Deck steel decking is for use with double rivet units **ONLY**.

5 DAY SHIPPING ON ALL IN-STOCK PRODUCTS

POST CAPACITY CHART

Recommended safe loads (per post) for use only where seismic forces are not a factor

BEAM SPACING	STD. ANGLE POST CAPACITY	HEAVY ANGLE POST CAPACITY
12"	1530	1735
18"	1520	1720
24"	1510	1695
30"	1490	1680
36"	1350	1660
42"	990	1560
48"	755	1195

BEAM SPACING	STANDARD/HEAVY-DUTY T-POST CAPACITY
12"	5045
18"	4965
24"	4850
30"	4705
36"	4525
42"	4315
48"	4075

Calculate needed post capacity by multiplying the number of shelves by the per shelf load then divide by 4 (Angle posts), or by 2 (T-Posts) then refer to the chart below for the approximate post needed to meet your job requirement.

Post capacities are based on the maximum vertical distance between left-to-right beams or front-to-back beams, whichever is greater. In single rivet beam units, the vertical distance between front-to-back beams will usually govern. Tie plates must be spaced no more than 48 inches apart to insure structural stability when joining angle post together. All units require tie plates at top and bottom.

The above capacities are not intended for use when designing multi-level systems or for specific requirements where seismic forces are a factor. For specific multi-level or seismic requirements contact your Hallowell Sales Manager.

	72	600	-	1000	-

DESIGN CRITERIA:

All units must have a full perimeter of double rivet beams at the top and bottom to insure a stable and rigid unit. All units using single rivet beams 10'0" to 18'0" in height, require an additional double rivet perimeter beam level located approximately in the middle of the unit.

All single rivet beam units must have one (1) intermediate pair of front to back beams for 7'0" and 8'0" high units and (2) intermediate pair of front to back beams for 9'0" high units. For 10'0" to 18'0" high units refer to the above paragraph.

DO NOT exceed 48" between front to back beams. Single Rivet and Double Rivet Front-to-Back Beams may be common when using T-Posts on units up to 8' high.

All intermediate single rivet levels over 24 inches deep must also have single rivet beams supporting the particle board front to back.

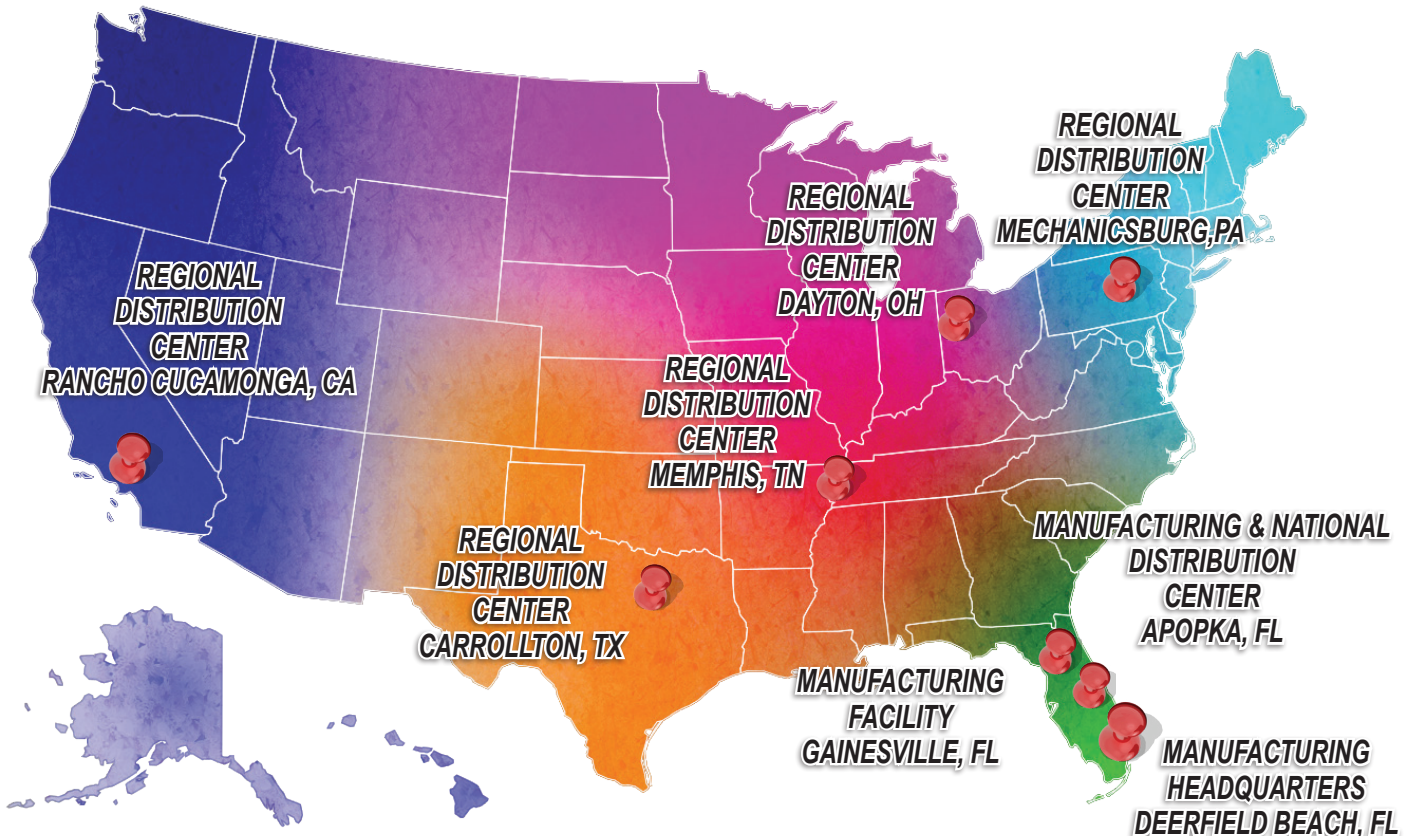

All double rivet beam units must have front to back beams at each shelf level.

(*) One (1) support per pair of beams except 96" which have two (2) supports
 (**) Refer to shelf load capacities for beam capacities when depth is 30", 36", and 48"
 (***) Beam rotation is less than 5 degrees

ADVANTAGES OF SIX DISTRIBUTION CENTERS

- ✓ **REDUCES FREIGHT COST**
- ✓ **REDUCES TRANSIT TIME**
- ✓ **MINIMIZES CARRIER HANDLING**

QUICK-SHIP BENEFITS

- ✓ **NO SETUP CHARGES**
- ✓ **NO MINIMUM ORDER QUANTITY**
- ✓ **INDUSTRY'S BEST DISCOUNT**

HALLOWELL HAS YOU COVERED COAST-TO-COAST

CALL **866-566-0500** FOR MORE INFORMATION ON OUR QUICK-SHIP PROGRAM

THE FASTEST SHIPPING WITH THE MOST SECURE PACKAGING

In an industry where damage in transit can be difficult to prevent, Hallowell goes the extra mile to ensure your purchase is protected by providing the industry's best packaging materials and techniques.

1. Pallet is sized to fit unit with no overhang and with bottom protection

2. Full height corner guards and Top cap are added.

3. Outside faces are protected

4. Extra packing is added to protect handles when projecting and the units are wrapped with poly wrap and double strapped in two directions to ensure stability.

KNOCK-DOWN SHIPMENTS

- All components are packaged in custom designed corrugated cartons
- Pallets are sized so that no material overhangs the pallet
- All cartons are securely strapped to pallets

FULLY-ASSEMBLED SHIPMENTS

- Pallets are sized so that no part of a unit overhangs the pallet
- When two units share a pallet, the inward facing locker fronts are separated by corrugated spacers
- Locker tops and bottoms are protected by specially designed capping cartons
- Outside corners are protected with heavy-duty full height corner guards
- Perimeter surfaces are protected with full height corrugated sheets
- Locker fronts always face the center of a pallet when possible
- Units are wrapped with Heavy-gauge clear poly wrap
- Units are double strapped in two directions to ensure maximum stability
